Boone, NC / Mooresville, NC

Software Engineering | AI-Powered Applications

Computer Science senior with a strong foundation in C and Java and hands-on projects in web development, service integration, and AI workflows. Pursuing Python-focused software engineering and AI application development.

EDUCATION

Appalachian State University **Expected May 2027**
Bachelor of Science in Computer Science | GPA: 3.5
Chancellor's List (2x) | Dean's List (1x)

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript, TypeScript, Swift, Luau, SQL
Web & Mobile: HTML, CSS, React, Next.js, SwiftUI, UIKit
AI & Automation: Retell AI, n8n, OpenAI Agents SDK, API integration, webhooks
Tools & Platforms: Git, GitHub, Cloudflare Workers, D1, Firebase Functions

SELECTED TECHNICAL PROJECTS

Alegria Automation - AI Voice Receptionist — Demo site (sign-in)

- Developed an HVAC voice-receptionist prototype using Retell AI, n8n, and Google Sheets to capture service inquiries and structured post-call records.
- Implemented a Cloudflare Workers/D1 staging backend with signed webhook validation, schema normalization, duplicate-event handling, and a durable alert outbox.
- Built a Python planning-only controller with the OpenAI Agents SDK, structured role outputs, persistent job records, bounded retries, and unit tests.

ReAppraise - iOS Resale Value Estimator — GitHub

- Built a SwiftUI iOS prototype with camera/photo-library input, OCR-derived search queries, and Firebase callable-function integrations for Google Cloud Vision and eBay.
- Implemented median and percentile price estimates with condition adjustments, asynchronous image analysis, and stale-response handling.

PAWNARCHY - Roblox Combat Game Prototype

Luau · Roblox Studio · Rojo

- Implemented modular character abilities and server-controlled damage, cooldowns, progression, and action validation, with a client camera and ability HUD.
- Added regression checks for combat, wall collisions, duplicate hits, and death/respawn behavior; documented Studio validation and remaining multiplayer checks.

EXPERIENCE

ASG Executive Search & Recruitment — October 2026 - Present

Web Development Intern | Next.js · React · TypeScript

- Developing a multi-page recruitment website with reusable React components, typed content, and Next.js routing.
- Implemented accessible mobile navigation, interactive search-process stages, and page-specific SEO metadata.

Dulcet & Delish Cafe — 2018 - Present

Barista / Server | Mooresville, NC | Website · GitHub

- Developed a responsive HTML/CSS/JavaScript business website with mobile navigation, menu pages, a contact form, and local-business structured data.
- Support customer service, POS transactions, food and espresso preparation, and opening/closing operations.

Habitat for Humanity ReStore — September 2025 - May 2026

Customer Care Associate

- Assisted customers, processed donated inventory, and maintained Excel records of model numbers, quantities, and pricing.
