

PROFESSIONAL SUMMARY

Rising senior studying Computer Science with a current 3.5 GPA and hands-on experience building responsive websites, AI-enabled business systems, cloud-backed prototypes, and API-integrated software. Interested in software engineering, web development, databases, and user-focused product design.

EDUCATION

Appalachian State University

Bachelor of Science in Computer Science

Expected Graduation: May 2027

Current GPA: 3.5

- Chancellor's List, 2x
- Dean's List, 1x

TECHNICAL SKILLS

Languages

Java, C, Haskell, JavaScript, Swift, SQL

Web

HTML5, CSS3, Responsive Design, Semantic HTML

Frameworks & Platforms

SwiftUI, UIKit, Firebase, Firebase Functions

APIs & Tools

Google Cloud Vision, eBay API, Git, GitHub, Xcode, VS Code, Swift Package Manager

Concepts

Data Structures, Object-Oriented Programming (OOP), API Integration, Database Design, Software Development Life Cycle (SDLC), User Interface and User Experience (UI/UX) Design

RELEVANT COURSEWORK

Software Engineering, Data Structures, Database Systems, Computer Systems, Programming Languages, Statistics, Linear Algebra, Technical Communication

SELECTED PROJECTS

ReAppraise

GitHub ↗

iOS Resale Value Estimator

Swift · SwiftUI · UIKit · Firebase Functions · Vision API · eBay API

- Developed an iOS prototype that estimates resale or donation values from user-provided photos.
- Built camera and photo-library workflows and integrated callable cloud functions to process images and retrieve comparable product listings.
- Combined OCR, detected labels, logos, categories, and user input into concise search queries; calculated median-based price ranges with condition adjustments.

Dulcet & Delish Cafe Website

Live ↗ GitHub ↗

Responsive Local Business Website

HTML5 · CSS3 · JavaScript · Schema.org

- Designed and developed a responsive, multi-page café website with mobile navigation, menu, contact form, ordering paths, and map directions.
- Improved discoverability and usability with semantic HTML, responsive breakpoints, SEO metadata, Open Graph tags, and local-business JSON-LD.

Alegria Automation

Live ↗

AI Receptionist Platform for HVAC Businesses

TypeScript · Cloudflare Workers · D1 · Retell AI · n8n

- Built a configurable AI receptionist platform that captures HVAC service inquiries, applies business-specific urgency rules, and produces structured call records.
- Designed a secure serverless intake layer with request verification, rate limiting, retention controls, and feature-gated operational workflows.
- Integrated a reusable automation foundation for confirmations, owner alerts, lead routing, and client-specific follow-up processes.

EXPERIENCE

ASG Executive Search & Recruitment

Starting October 2026

Incoming Web Development Intern

- Incoming role focused on creating and designing ASG's website with a clear user experience for candidates and clients.
- Will incorporate automation that supports candidate and client intake and recruiting workflows.

Habitat for Humanity ReStore

September 2025 – May 2026

Customer Care Associate

- Assisted customers and processed, organized, and stocked donated inventory, including safe movement of large items.
- Maintained Microsoft Excel inventory records with model numbers, descriptions, quantities, and pricing.

Dulcet & Delish Cafe

2018 – Present

Barista / Server · Mooresville, NC

- Deliver reliable customer service across POS transactions, serving, hosting, to-go orders, and high-volume rushes for a family-owned restaurant.
- Support daily operations through cash handling, opening and closing, food and espresso preparation, catering, restocking, and sanitation.
- Contribute to menu design, in-house displays, and social media content.
